XENON Computing & Technical Services

In today's business world, you're constantly challenged to produce more—and to do so with fewer people, leaner budgets, and strained IT resources. As a result, making the right software and technology choices for your business is critical.

With our experience in the onshore and offshore construction industry, we can help you with dynamic project management tools used during construction providing users with real time information for making critical and timely decisions.

SOLUTION OVERVIEW

Construction Manager (CM) is designed to support the management of all aspects of Project Inspection. A strong emphasis is placed on tracking the materials, welding and non-destructive examination of complex offshore structures such as FPSOs, Spars, Tensions Leg Platforms, Complaint Towers and Production Decks. The Program is intended to follow design codes such as BSI, ANSI and ASME.

In addition, our software—built on Microsoft® technology—can help you:

- Improve your business productivity by easily connecting teams in your organization to enable information sharing, collaboration, and better decision making.

- Find a customized solution—built on familiar and easy-to-use technology— that meets your unique business needs and can scale with you as you grow.

- Get more value from your IT investment, extending enterprise-class capabilities while reducing security risks, downtime, unnecessary costs, and complexity.

- Real Time project status.

BUILT ON MICROSOFT PLATFORM TECHNOLOGIES

We build our custom applications on Microsoft platform technologies to give you unified and comprehensive solutions that are cost-efficient, reliable, and secure.

Enabling Technologies:

- Windows Server® 2008

- Microsoft SQL Server™ 2005/2008

- Windows Vista®

Benefits to You:

- Material Specification Verification

- Welder and Inspector Qualifications

- Get rich security and manageability features.

- Tracking of Welding and NDE

- Automation techniques are utilized to reduce the amount of data entry errors.

- Multiple project support.
